

Eurofuel Technical Workshop
EU Field Tests: where are we?
11 October 2022
10h00-12h00 (CET)

To assess the compatibility between existing boilers and different blends of products, Eurofuel and the European Heating Industry (EHI) run field tests¹.

In total, about more than two hundred family homes across Europe were involved in the field tests. Due to regional requirements, different types of liquid fuels were used.

Some minor technical adjustments may be needed, depending on the fuel mix and boiler, but the preliminary results show that compatibility can be achieved at a minimal cost for consumers: the existing equipment is future-proof. The results are promising, all appliances are running well, and commercial scale-up is under discussion.

The event will be presenting the interim results.

10h00	Welcome	Moritz Bellinghen, President Eurofuel
10h10	Results of Belgian field tests	Guido Saenen, Informazout
10h25	Results of German field tests	Wilfried Linke, BDH
10h40	EU field test & Green fuel ready label	Moritz Bellinghen, Eurofuel
10h55	Burner adaptations	Erica Furin, Ariston Thermo Group*
11h10	Boiler adaptations	Raphael Lang, Buderus
11h25	Additives adaptations	Martin Müller, Cirkel
11h40	Q&A	
11h55	Summary, next steps	Sandrine Devos & Moritz Bellinghen, Eurofuel

**Speakers invited, not confirmed*
